

BMT LIGHTING

Film lighting experts

INTRODUCTION

CONCISE PROPOSAL DOCUMENT

Brief engagement document for new clients which
need to hire our lights for film.

BMT
BLACK MATERIAL

PHILOSOPHY

BMT Lighting is an inspired Lighting company with a simple philosophy embedded within our Core Brand, BlackMaterial.

BlackMaterial can be viewed as a hub for talent, in culture, in film, and in the creative space. In the same light BMT Lighting is offering Giant service in a giant space with a competitive service model. We simplify delivery and service for our client, taking a personalized approach to the way we serve.

BMT Lighting is the brainchild of a Director who also lights, Thamsanqa Xhosa. Thami (for short) has been in the film industry for 16 years, now. Which has given him insight into all layers of the industry and the disciplines. And so, he has modelled BMT Lighting to solve the various problems productions usually experience. However, he has not limited BMT lighting to that, he has created a high-performance culture among his partners and staff.

August, 2020
